PROFILE

Software development student at UniCollege with seven Certiport IT Specialist certifications. I enjoy working through problems, building useful software, and learning from experienced developers. Seeking an internship or junior developer role where I can contribute and grow.

PRACTICAL SOFTWARE DEVELOPMENT

UniCollege — Course and capstone projects | 2026–Present
Build working applications through practical coursework, collaborate with peers to deliver project milestones, and apply software development concepts to real use cases.

SELECTED PROJECTS

TrueMarket — Supermarket point-of-sale and operations
Built a full-stack, role-based POS with barcode/SKU checkout, cashier shifts, sales and refunds, inventory receiving and full-store counts, low-stock tracking, and owner/manager sales reports.
Technologies: Next.js App Router, React, TypeScript, Supabase Auth and PostgreSQL, Tailwind CSS, Zod
Source: github.com/Legionaka/pos-system

Medi-Clinic — Healthcare workflow portal
Built a demonstration portal with separate patient, clinician, and administrator workspaces for appointments, records, billing, and clinic operations.
Technologies: Next.js, React, Supabase Auth, PostgreSQL
Source: github.com/Legionaka/5SOC_Dash | Demo: 5-soc-dash-zlps.vercel.app

Altis Airport Explorer — Route discovery
Created an airport discovery and trip-planning experience with route search and airport information.
Technologies: Node.js, Express, Third-party APIs
Source: github.com/Legionaka/atlis_capstone

Tight Lines — Fishing log and planner
Built a mobile-friendly fishing log with offline support, saved trip records, and sync-ready local data handling.
Technologies: Offline-first web app, Local data storage
Source: github.com/Legionaka/paap_app5

Portfolio — Personal portfolio system
Built a responsive portfolio with evidence-backed skills, dynamic project listings, and an owner-protected project admin.
Technologies: Next.js, React, TypeScript, Supabase, Tailwind CSS
Source: github.com/Legionaka/portfolio_v3

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS
Frameworks & tools: React, Next.js, Flask, Node.js, Express, .NET (C#), REST APIs, SQLite, PostgreSQL, Supabase, Tailwind CSS, Git/GitHub, Vercel
Strengths: Problem solving, computational thinking, teamwork, clear communication

EDUCATION

IT Programming | UniCollege | Full-time programme, in progress (2026–Present)
National Senior Certificate — Bachelor Pass | Hoërskool Monument | 2021–2025

CERTIFICATIONS

Issuer: Certiport (Pearson VUE)
IT Specialist: Databases | Sep 2026
IT Specialist: HTML5 Application Development | Aug 2026
IT Specialist: Software Development | Aug 2026
IT Specialist: JavaScript | Jul 2026
IT Specialist: Python | May 2026
IT Specialist: HTML and CSS | Mar 2026
IT Specialist: Computational Thinking | Mar 2026
